

MagnaTense™ Tension System

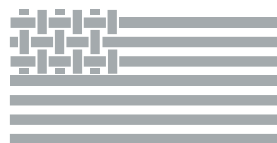

Proven System for
Tensioning Critical Yarns

Features __

- Virtually self-cleaning
- Conductive ceramic eyelets
- Precision zinc alloy housing
- PLC controlled for easy adjustments via touchscreen
- Up to 20 different yarn profiles
- No sharp angles to damage yarn
- Difficult to thread incorrectly
- Only one wrap required
- Applied tension not affected by speed
- Built in Stopmotion

Tension Range	5-35 grams
Operating Speed	0-800 mpm
Accuracy	+/- 1/2 gram
Input Voltage	110-220 VAC, Single Phase 50/60
Eyelets	Conductive Ceramic
Tension Zones	Up to 6

PROUDLY MADE IN THE USA
